● What frontend technologies and frameworks have you worked on?
The frontend technologies that I've worked with includes HTML, CSS, Bootstrap, JavaScript and ReactJs.

● Have you ever worked with Shopify or any other e-commerce platforms, or do you have
any experience with them?
I've not worked with Shopify yet, although I'm open to learn to work with it.
I've worked on a few projects where I've created product pages for my previous company that I was working with using HTML5, CSS and JavaScript. And some of my personal projects includes ecommerce landing pages.

● On a scale of 1 to 10, how would you rate your proficiency in HTML, CSS, and JavaScript?
I would rate my skills with an 8.

● Do you find any specific browser more challenging to work with than others, and how do you resolve browser compatibility issues?
I've used Google Chrome and Microsoft Edge.
But Google Chrome is preferred more among most developers.
I didn't find either of them to be challenging.

● Have you worked on projects where you had complete ownership of the project?
I have worked on projects where I was given the design and a few requirements which I was given the choice of adding according to my liking.

● Have you worked with any version control system like Git?
I have been working with Git and GitHub and have a good understanding of it.
